

I strongly urge you to reject the proposed Changes in Service outlined in N-2021-1, which would dramatically slow, and even eliminate, mail delivery. It would be disastrous to millions of US citizens like me who rely on a modern, speedy and affordable mail service for prompt and reliable prescription delivery, bill paying, business correspondence, and contact with our friends and loved ones. Please reject the draconian changes outlined in the proposal and restore the integrity of the US Postal Service as envisioned in the US Constitution.
